SmartPorts Project CB239 - EU Interreg Central Baltic project

Project title:

Modern and attractive small ports network through cross-border interactive information system, joint marketing and improved port services (SmartPorts)

Project duration:

01.10.2015 – 30.09.2017.

Project budget:

1 468 657.60 EUR, ERDF funding 1 225 259.96 EUR

SmartPorts project aims were:

During the SmartPorts project the ports have improved quality of their services by investing in safety- and environment equipment and port technology. A modern ICT solution to integrate region's small port network has been launched. Ports have made investments in marketing tools and activities to double the number of visitors by the sea in 2020.

SmartPorts project resulted in:

Improvement in level of services in 16 ports, in 4 countries (services were harmonized) by end of 2017, increased in number of foreign visitors by the sea (doubled by 2020), increased in length of stay of foreign visitors by the sea (doubled by 2020).
